

BALLINGER EQUINE

Ambulatory Veterinary Assistant

Opportunity for new or recently qualified vet

Continued expansion of our progressive, dynamic ambulatory practice means we are seeking to appoint a new or recently graduated veterinary surgeon. With a reputation for clinical excellence and client focussed care, we offer a supportive working environment for a recent graduate looking to develop their career in a friendly, well-equipped practice.

Ballinger Equine is a modern, first-opinion equine ambulatory practice with a busy caseload ranging from top competition horses and racehorses to leisure and pleasure horses and ponies. We are looking to recruit an equine ambulatory assistant to work from our new Hertfordshire HQ. Full case investigation and follow-up is actively encouraged and supported.

Confident handling horses, you'll thrive on using your initiative whilst benefitting from the support and guidance from our veterinary director. An enthusiastic team player, you'll enjoy working with your veterinary and administrative colleagues. And you'll be willing and able to participate in the practice on-call and out-of-hours rota.

With good written and verbal communication skills, and a keen interest in pursuing your own CPD, you'll bring energy, enthusiasm, compassion and commitment to one of the region's busiest and best equine ambulatory practices.

A clean, current UK driving licence is required for this role. Remuneration is competitive. Our new practice office has excellent facilities with central London just a quick and easy drive or short rail journey away.

Prospective applicants are encouraged to call Dr Susanna Ballinger MRCVS in confidence on 07539 598007 to discuss the role.

All applications should consist of:

- Detailed CV.
- Details of three professional referees (who will only be approached with your permission).

- A supporting statement outlining why you want to work with us and what added value you bring to Ballinger Equine.

Your application is to be emailed to a.hillier@ballingerequine.com
